

Unley Chill Beanie

Original Design by The Crochet Fix

Pattern Details

OSFM beanie with measurements as follows:

80 chains circumference in 8ply/ DK weight results in: ~53cm/ ~21" relaxed circumference at brim and ~22cm/ ~8.5" length from brim to peak. This is a medium to large women's/ small to medium men's size. **Note:** The stitches used for this beanie do give a few cm of stretch, when worn. Resizing tips are provided in this document.

Skill level: Advanced beginner to intermediate.

Stitch terminology: US – refer to **Abbreviations** for stitches used.

Yarn: 8 ply/ Cat. 3/ DK weight wool or wool mix, ~120 grams/ ~4.2 ounces in total

Hook: 4 mm/ size G.

Gauge: First four rounds should result in circle with ~53 cm/ ~21" diameter. One square/ block should be ~ 2.5cm/ 1" wide by ~2.5cm/ 1" tall.

Remember to spam me **#UnleyChillBeanie** @TheCrochetFix on social media with your finished projects. These have been my 'Go To' charity beanie over the 20 odd years I have been making them as they are warm but also look really nice. Add a pom pom for some extra charm.

This is an original pattern by **Farrah Jane Tate**. You are welcome to sell products you've made using my patterns; however I ask that you refer to the exact name of my pattern somewhere in the text of your listing. You may not copy, re-publish, sell, distribute, translate without permission, or claim my photos or patterns as your own in any way. **Please note:** If you have downloaded this pattern from a site other than Ravelry, Love Crochet, or my personal blog, you may not have the most current version. Please visit one of the aforementioned sites to download an official, version-controlled copy.

Pattern Synopsis

Beanie construction:

- Alternating blocks of **Front Post (Fp)** and **Back Post (Bp)** stitches, in a basket weave pattern formation.
One single basket weave square/ block is 4 stitches wide and 4 rounds tall.
The basket weave pattern repeat is two squares wide and two squares tall (i.e. 8 stitches wide and 8 rounds tall).
- Worked **right side** always, in **rounds**, from **bottom (brim) upwards (to peak)** (using decrease stitches to shape the beanie).
- **Ribbed brim** can be added *before* the beanie basket weave pattern rounds are commenced *or after* the beanie basket weave pattern rounds are completed. Instructions are provided for both options.

Tips

- For best results, use a **yarn** that is composed of a fibre that yields good stitch definition (not overly soft or fluffy). For example, I have used 8ply 4 Seasons Pure Wool Entwine for the pictured beanies. Fibres other than wool can also be used. I have previously made many of these beanies with acrylic yarn.
- Use the recommended **hook size** as a guide only. My tension is reasonably loose, and I have a 'Rider' Golden Loop style. For an average sized adult beanie, check that your gauge is close to the gauge mentioned in the Pattern Details. If not, adjust tension and/or hook size and/or Golden Loop style to approximately meet the gauge.

Changing Colours

Options include using: yarn of one solid colour; variegated yarn; two different colours alternating for each subsequent square/ block in the round (checkerboard effect); one colour per four rounds; or, work colour changes according to your individual style.

Abbreviations

Sl St = Slip Stitch

Ch = Chain

SC = Single Crochet

FpDC = Double Crochet around the front of the stitch post

BpDC = Double Crochet around the back of the stitch post

FpDC2Tog = Front Post Double Crochet 2 stitches together (stitch decrease)

BpDC2Tog = Back Post Double Crochet 2 stitches together (stitch decrease)

FpHDC = Half Double Crochet around the front of the stitch post

BpHDC = Half Double Crochet around the back of the stitch post

FpHDC2Tog = Front Post Half Double Crochet 2 stitches together (stitch decrease)

BpDC2Tog = Back Post Half Double Crochet 2 stitches together (stitch decrease)

FpDCStdSt = Front Post Double Crochet Standing Stitch

BpDCStdSt = Back Post Double Crochet Standing Stitch

FpHDCStdSt = Front Post Half Double Crochet Standing Stitch

BpHDCStdSt = Back Post Half Double Crochet Standing Stitch

FpHDC2TogStdSt = Front Post Double Crochet Standing Stitch over the first 2 stitches together (stitch decrease)

BpHDC2TogStdSt = Back Post Double Crochet Standing Stitch over the first 2 stitches together (stitch decrease)

Special Stitch Instructions - StdSt¹

FpDCStdSt:

1. Ch 1 and then SC around the front post of the first stitch from the previous round.
2. Ch1 and then SC in the *front loop only* of the SC made in Step 1.

BpDCStdSt:

As per FpDCStdSt except substitute back post for front post in Step 1.

FpHDCStdSt:

1. Ch 1 and then SC around the front post of the first stitch from the previous round.
2. Ch1 and then SC in *both loops* of the SC made in Step 1.

BpHDCStdSt:

As per FpHDCStdSt except substitute back post for front post in Step 1.

2TogStdSt stitches:

As per stitch instructions above, *except*, commence stitch by working over 2 stitches together (such that a stitch reduction results).

¹ The Standing Stitch is worked at the start of a new round so that the seam is less obvious. Please note there are a number of ways to work a standing stitch and I personally vary my method depending on the item I am making. If you already have a method that works for you, please substitute your preferred method where this stitch is referenced in the pattern instructions.

Pattern Instructions

The beanie can be constructed two different ways:

- 1) **Basket weave patterned beanie first** and then the **brim next**.
- 2) **Brim first** and then the **basket weave pattern beanie next**.

I have included both options, in the case that you have a firm preference for beanie construction. I personally use the first method, as this is an easy way to adjust the depth of the beanie (by adding or subtracting brim rounds), without having to adjust the number of rounds of the basket weave pattern (this being the more complex alternative). I also find that working the brim after the beanie, achieves a neater finish.

Note: Always skip the Ch 1 when working a Sl St to finish the round, and instead Sl St into the top of the StndSt.

Beanie First, Brim Next

FOUNDATION ROUND – Chainless²

1. Make a chainless foundation round of 80 DCs total. **Note:** for the last chainless DC you will need to join this stitch at the base to the first chainless DC, so that the first round is properly joined.
2. Sl St into the top of the first chainless DC to complete the round.
(Stitch Count: 80 DCs in a round)

² If you prefer not to use a chainless foundation, then work 80 chains using a 4.5 mm hook, and then Sl St into first Ch to form circle. Then switch to a 4 mm hook and work the 80 DCs around (with a Sl St to complete the first round).

BASKET WEAVE PATTERN ROUNDS

First Basket Weave Repeat

ROUND 1

1. To commence the round, FpDCStndSt over the first chainless DC from previous round.
2. FpDC over the next three stitches.
3. BpDC over the next four stitches.
4. FpDC over the next four stitches.
5. BpDC over the next four stitches
6. Repeat Steps 4 and 5 eight times.
7. Sl St into the FpDCStndSt from Step 1.
(Stitch Count: 80 (40 FpDC and 40 BpDC, including StndSt))

ROUND 2

1. To commence the round, FpDCStndSt over previous round DCStndSt.
2. FpDC over the next three stitches.
3. BpDC over the next four stitches.
4. FpDC over the next four stitches.
5. BpDC over the next four stitches
6. Repeat Steps 4 and 5 eight times.
7. Sl St into the FpDCStndSt from Step 1.
(Stitch Count: 80 (40 FpDC and 40 BpDC, including StndSt))

ROUNDS 3 & 4

Repeat Round 2 for each of these rounds.

ROUND 5

1. To commence the round, BpDCStndSt over previous round DCStndSt.
2. BpDC over the next three stitches.
3. FpDC over the next four stitches.
4. BpDC over the next four stitches.
5. FpDC over the next four stitches
6. Repeat Steps 4 and 5 eight times.
7. Sl St into the BpDCStndSt from Step 1.
(Stitch Count: 80 (40 BpDC and 40 FpDC, including StndSt))

ROUNDS 6 TO 8

Repeat Round 5 for each of these rounds.

Second Basket Weave Repeat

ROUND 9 -12

Repeat Round 2 a total of four times.

ROUND 13-15

Repeat Round 5 a total of three times.

ROUND 16— stitch count decrease

1. To commence the round, BpDCStdSt over previous round DCStdSt.
 2. Bp2DCTog over next two stitches.
 3. BpDC over next stitch.
 4. FpDC over next stitch.
 5. FpDC2Tog over next two stitches.
 6. FpDC over next stitch.
 7. BpDC over next stitch.
 8. BpDC2Tog over next two stitches.
 9. BpDC over next stitch.
 10. FpDC over next stitch.
 11. FpDC2Tog over next two stitches.
 12. FpDC over next stitch.
 13. Repeat Steps 7 to 12 eight times.
 14. Sl St into the BpDCStdSt from Step 1.
- (Stitch Count: 60 (30 BpDC and 30 FpDC, including StdSt))

Third Basket Weave Repeat

ROUND 17

1. To commence the round, FpDCStdSt over previous round DCStdSt.
 2. FpDC over next two stitches.
 3. BpDC over next three stitches.
 4. FpDC over next three stitches.
 5. BpDC over next three stitches.
 6. Repeat Steps 4 and 5 eight times.
 7. Sl St into the FpDCStdSt from Step 1.
- (Stitch Count: 60 (30 FpDC and 30 BpDC, including StdSt))

ROUNDS 18–19

Repeat Round 17 two times.

ROUND 20— stitch count decrease

1. To commence the round, FpDCStdSt over previous round DCStdSt.
 2. FpDC2Tog over next two stitches.
 3. BpDC over next stitch.
 4. BpDC2Tog over next two stitches.
 5. FpDC over next stitch.
 6. FpDC2Tog over next two stitches.
 7. BpDC over next stitch.
 8. BpDC2Tog over next two stitches.
 9. Repeat Steps 5 to 8 eight times.
 10. Sl St into the FpDCStdSt from Step 1.
- (Stitch Count: 40 (20 FpDC and 20 BpDC, including StdSt))

ROUND 21

2. To commence the round, BpHDCStdSt over previous round DCStdSt.
 1. BpHDC over next stitch.
 2. FpHDC over each of the next two stitches.
 3. BpHDC over each of the next two stitches.
 4. FpHDC over each of the next two stitches.
 5. Repeat Steps 4 and 5 eight times.
 6. Sl St into the BpHDCStdSt from Step 1.
- (Stitch Count: 40 (20 BpHDC and 20 FpHDC, including StdSt))

ROUND 22

Repeat Round 21.

ROUND 23— stitch count decrease

1. To commence the round, BpHDC2TogStdSt over *both* the HDCStdSt *and* the next BpHDC stitch from the previous round.
 2. FpHDC2Tog over the next two stitches.
 3. BpHDC2Tog over the next two stitches.
 4. FpHDC2Tog over the next two stitches.
 5. Repeat Steps 3 and 4 eight times.
 6. Sl St into the BpHDC2TogStdSt from Step 1.
- (Stitch Count: 20 (10 FpHDC and 10 BpHDC, including StdSt))

ROUND 24

1. To commence the round, BpHDCStdSt over BpHDC2TogStdSt from previous round.
2. FpHDC over the next stitch.

3. BpHDC over the next stitch.
 4. FpHDC over the next stitch.
 5. Repeat Steps 3 and 4 eight times.
 6. Sl St into the BpHDCStndSt from Step 1.
- (Stitch Count: 20 (10 BpHDC and 10 FpHDC, including StndSt))

Continue to Decrease for Remaining Rounds

ROUND 25– Stitch Count decrease

1. To commence the round, FpHDC2TogStndSt over *both* the BpHDCStndSt *and* the next BpHDC stitch from the previous round.
 2. FpHDC2Tog over next two stitches.
 3. Repeat Step 2 eight times.
 4. Sl St into the FpHDC2TogStndSt from Step 1.
- (Stitch Count: 10 FpHDC, including StndSt)

ROUND 26– Stitch Count decrease

1. To commence the round, FpHDC2TogStndSt over *both* the FpHDC2TogStndSt *and* the next FpHDC2Tog stitch from the previous round.
 2. FpHDC2Tog over next two stitches.
 3. Repeat Step 2 three times.
 4. Sl St into the FpHDC2TogStndSt from Step 1.
- (Stitch Count: 5 FpHDC, including StndSt)

FINISHING

Cut yarn leaving a long tail. Stitch the remaining five stitches together with a darning needle to close the circle, and then sew in the yarn end securely. Top with a pom pom, if this is your preference.

TEXTURED BRIM ROUNDS

ROUND 1

Rotate the beanie 180° so that the beanie peak is pointing downwards and the foundation round is now the upmost round. Ensuring that you continue to work right side only, join the yarn around the base of the first foundation stitch made. (You will now be working in the opposite direction; outwards from the opposite side of the foundation round.) Sl St into next stitch and each stitch around. Sl St into first stitch to complete the round. (Stitch Count: 80 Sl St)

ROUND 2

BpHDCStndSt over the post of the first foundation stitch, at its base. Then BpHDC over the post of each stitch around. Sl St into BpHDCStndSt to complete the round. (Stitch Count: 80 BpHDC)

ROUNDS 3 TO 5³

Repeat Round 2 for each of these rounds, except commence with BpHDCStndSt over previous round BpHDCStndSt.

ROUND 6

FpHDCStndSt over previous round BpHDCStndSt. Then FpHDC over each stitch around. Sl St into FpHDCStndSt to complete the round. Fasten off yarn, leaving a long tail, and then sew in the yarn end securely.

³ Note: construct additional repeats if a deeper brim is preferred. For men's size add an additional 2 to 3 repeats.

Brim First, Beanie Next

FOUNDATION ROUND – Chainless⁴

1. Make a chainless foundation row of 80 HDCs total. **Note:** for the last chainless HDC you will need to join this stitch at the base to the first chainless HDC, so that the first round is properly joined.
2. Sl St into top of first chainless HDC to complete the round.
(Stitch Count: 80 HDCs in a round)

TEXTURED BRIM ROUNDS

ROUND 1

BpHDCStndSt in the first foundation HDC stitch, then work BpHDC over the post of each stitch around, and then Sl St into the BpHDCStndSt (Stitch Count: 80 BpHDCs).

ROUNDS 2 TO 5⁵

Repeat Round 1 for each of these rounds, except commence with BpHDCStndSt over the previous round BpHDCStndSt. (Stitch Count: 80 BpHDCs). **Note:** Do not fasten off.

BRIM FINISHING ROUND

Either use the other end of the yarn, or come back and complete this round after the basket weave beanie has been made. Rotate the beanie 180° so that the foundation round is now the upmost round. Ensuring that you continue to work right side only, join the yarn in the chain in the base of the first HDC foundation stitch. (You will now be working in the opposite direction from Rounds 2 to 5; outwards from the opposite side of the foundation round.) FpHDCStndSt over the first HDC foundation stitch post, then work FpHDC over the post of each stitch around, and then Sl St into the FpHDCStndSt. Fasten off yarn leaving a long tail, and then sew in the yarn end securely.

BASKET WEAVE PATTERN ROUNDS

If the Brim Finishing Round was last worked, rotate the hat so the foundation round is down most. Follow **Beanie First, Brim Next** instructions. **Note:** In Round 1, you will be

working over the last BpHDC round of the brim, rather than the Foundation Round as indicated in the instructions.

⁴ If you prefer not to use a chainless foundation, then work 80 chains using a 4.5 mm hook, and then Sl St into first Ch to form circle. Then switch to a 4 mm hook and work the 80 HDCs around (with a Sl St to complete the first round).

⁵ Note: construct additional repeats if a deeper brim is preferred. For men's size add an additional 2 to 3 repeats.

Messy Hair Bun/ Pony Tail option

Work as per pattern above but instead, finish beanie after Round 24. Sl St in each stitch around to neaten the finish. Alternatively, work a round of SC over a small to medium size elastic hair band.

Basic Resizing Tips

There are **three resizing options**:

- Adjust **tension** and/ or **hook size** and/ or **Golden Loop style** using DK yarn, and retain the stitch count and total number of rounds as per above pattern. This can be used to achieve a **small variation** to the size of the standard beanie.
- Adjust the **weight category of yarn** used and retain the stitch count and total number of rounds as per above pattern. This will achieve a **larger variation** to the size of the standard beanie. For example, use Sport weight yarn to make a smaller and lighter weight beanie that will fit a smaller child. Or use Worsted weight yarn to make a larger and bulkier beanie, equivalent to men's medium to large size (depending on hook size used).
- Adjust the **total stitch count and number of rounds** using DK yarn. The process is described in some detail below.

The simpler and **approximate method** is to modify the total stitch count by a factor of eight. This retains the square/ block size as four stitches wide and the repeat as eight stitches wide.

The more complex **tailored method** – resulting in a more individually tailored fit – is to modify the block size by changing the number of stitches in a block.

Both of the above methods will require a **depth adjustment** if the total stitch count deviates significantly from the standard 80 Ch.

Note: The basket weave pattern does have some stretch so in most cases, the simpler option will suffice.

DK approximate method

- 1) Determine the person's **head circumference chain number (HCCN)**. Either:
 - a. Determine the relaxed number of chains that fit around the person's head, or
 - b. Ask the person to measure their head circumference using a tape measure. Then determine the relaxed number of chains that are equivalent to this tape measure circumference.
- 2) Get the **adjusted foundation chain number (AFCN)** by determining the factor of eight that is the closest to the **HCCN**.
For most adults this will be as per the standard pattern count of 80 Ch. Younger children will be adjusted to 72 Ch or 64 Ch, and babies to 56 Ch.

If the HCCN is in the middle of two factors of eight, use the smaller factor, as the beanie will stretch. For example, if the HCCN is 75-76 Ch then *use 72 Ch* as the AFCN, *rather than 80 Ch*. Ensure you work the brim with a slightly looser tension than you'd typically use, or alternatively, go up a quarter to half a hook size to work the brim.

- 3) If the **HCCN** and **AFCN** are discrepant by more than ~4 cm/ ~1.6" then you may wish to use the **tailored method**.

DK tailored method

- 1) Determine the HCCN as per DK approximate method Step 1.
- 2) Determine the closest AFCN that is a factor of six, eight or ten. This may be equal (=) to the HCCN, or it may not be equal (≠) to the HCCN. Where AFCN is not equal to the HCCN, I would recommend using an AFCN that is slightly less than HCCN, as the beanie will stretch when worn (provided you have determined the *relaxed* HCCN rather than *taut* HCCN).

DK tailored method examples:

AFCN = HCCN

HCCN = 60 Ch

AFCN = 60 Ch (factor of 6 or 10)

Foundation round will be 60 stitches. Each square/ block can be either three or five stitches wide (either six or ten stitches in a repeat). Using a block of three stitch width will result in twenty blocks around and ten repeats in a round. Using a block of five stitch width will result in twelve blocks around and six repeats in a round.

AFCN ≠ HCCN

HCCN = 68 stitches

AFCN = either 66 stitches (factor of 6) or 64 stitches (factor of 8)

Either:

Foundation round will be 66 stitches. Each square/ block will be three stitches wide (six stitches in a repeat). There will be 22 blocks around and 11 repeats in a round.

Or:

Foundation round will be 64 stitches. Each square/ block will be four stitches wide (eight stitches in a repeat). There will be 16 blocks around and 8 repeats in a round.

0.3	14/06/2019	Further enhancements from testing – detail provided for Step 2 instructions.

A Little Background Regarding This Design

I have made this beanie design for over 20 years. During this time I have made a number of these beanies as presents and many more for charity. They are a great charity beanie as the design is suitable for wear by both sexes, and the basket weave results in a warm fabric. Pair the beanie with a simple basket weave scarf, or basket weave cowl, for a very cosy charitable gift.

Whilst making charitable items for our #CityOfUnley #UnleyLibraries #UnleyCrochetCrew for #WinterWarmers2019, I decided it was time that I wrote up a pattern for the design, so that others can make charity beanies with it too.

I have named the beanie the Unley Chill Beanie as I have spent many wonderful years living in different parts of the Unley City Council Area, South Australia. It's a great place to live and bring up a family. Our #UnleyCrochetCrew made our first group charitable donation to the Unley Salvation Army, who have been actively serving the Unley community for over 150 years by providing valuable services and programs.

I hope you enjoy making your Unley Chill Beanie.
