Gauge

2" = 8 sts and 4 rows in dc. Gauge is not essential as a bag that is larger or smaller will still work nicely, and the bag is also easily adjustable in both circumference and height. When gauge is met, the bag will measure approximately 7" around and 5.5" high.

Materials

5.0mm (H) hook

Littlebean Loves Dragon's Eggs, 300 yds, (3 skeins of 50g each, Worsted Weight 100% Superwash Merino, 4-ply, 109 yards/50g)

If you use a different yarn, I recommend using a hook a size or two smaller than recommended for tighter stitches.

Abbreviations

US terms used throughout

sl st = slip stitch

st = stitch

ch = chain

sc = single crochet

fp sc = [front post single crochet](#)

hdc = half double crochet

dc = double crochet

tr = triple crochet

sk = skip

fsc = [foundation single crochet](#)

Notes

For all rounds except those that create the scales, a [chainless starting double crochet](#) is recommended instead of a traditional turning chain. On round 2 and 4 in the scale, a [ch 1, fp sc, ch 1] is recommended instead of the traditional ch-3 turning chain. On all rows, the pattern simply lists a dc; you can use a regular turning chain or whichever alternative you prefer.

The ch-1 turning ch in the closure rounds do not count as st.

Repeat stitches between the asterisks the indicated number of times.

The dragon scales are created using a modified crocodile stitch. If you're not familiar with the stitch, there's a number of YouTube videos, including the one from [Mooglyblog](#).

Unless otherwise noted, the first st in the round is always worked in same st as the join.

Base

Create a [magic loop](#)

Round 1: ch 2 (does not count as dc), 12 dc into magic loop, sl st to first dc to join - 12 dc total

Round 2: ch 2 (does not count as dc), 2 dc in same st as join, 2 dc in each st around, sl st to first dc to join - 24 dc total

For a wider bag, simply add additional increase rounds. For round 3 you'd increase in every second st, for round 4 you'd increase in every third st, etc. Each additional increase round adds 12 sts (or three scales) to the bag.

Scales

The scales are worked as a two-row repeat. Odd numbered rows form the framework; even numbered rows create the actual scales. Odd numbered rows use a [chainless starting double crochet](#). For even numbered rows, the first dc of the first scale is created with a [ch 1, fpdc, ch 1]. I highly recommend these ch-3 alternatives as they will make the stitches lie much nicer.

Round 1: dc in each dc - 24 sts total

When the bag is worked as stated, the scales will extend slightly below the bottom of the bag. For scales that are further up, work additional repeats of round 1.

I recommend weaving in the tail from when you worked the magic loop now, while it's still easily accessible, rather than waiting to the end, when you'll have to turn the bag inside out.

Round 2: *5 dc five down post of next dc, ch 2, 5 dc five up post of the next dc, sk 2 dc* around, sl st to fpdc to join - 6 scales total

Round 3: sl st to center of scale, *2 dc in the center of scale, 2 dc in the space between two skipped dc* around, sl st to first dc to join - 24 dc total

As you work the 2 dc in the space between the two skipped dc, enclose the stitches from the previous round to keep the scales closer to the body of the bag.

Round 4: sl st in first two dc, *5 dc down post of next dc, ch 2, 5 dc up post of next dc, sk 2 dc* around - 6 scales total

Be sure to sl st - if you don't, the scales will be stacked on top of each other instead of being offset.

Repeat round 3-4 an additional six times, for a total of eight rounds of scales. Or, repeat round 3-4 as desired for height.

Closure

Round 1: sl st to center of scale, *2 dc in the center of scale, 2 dc in the space between two skipped dc* around, sl st to first dc to join - 24 dc total

Round 1 forms the keyholes that you will be threading the drawstring through. For a closure with more space and wiggle room, use tr instead of dc.

Round 2: ch 1, hdc in each st around, sl st to first hdc to join - 24 hdc total

Round 3: ch 1, sc in each st around, [seamless join](#) - 24 sc total

Drawstring

fsc 45, or until drawstring is desired length. Thread through round 1 of the closure.

For a thinner drawstring, use a foundation sl st or a regular ch row. You can also use just a plain piece of yarn or ribbon.

FO, weave in ends, and enjoy!
