

Kreisel Fingerless Gloves

 knitting-and-so-on.blogspot.com/2015/10/kreisel-fingerless-gloves.html

Knitting and so on

**A blog with lots of knitting,
a bit of crochet,
and some ideas for recycling projects**

Keep your hands warm this winter with these stylish and unique fingerless gloves. They are crocheted around the thumb which allows you to show off your variegated yarn to the best effect.

These mitts are the crochet version of my knitted [Circle Mitts](#). Kreisel is the german word for (spinning) top.

Materials

- about 40 to 45 grams of fingering weight yarn
- 3mm crochet hook
- 4 removable stitch marker (e.g. safety pins)
- tapestry needle to weave in ends

Stitches and Abbreviations

 [131 projects](#)

- **ch**: chain
- **sc**: single crochet
- **sctbl**: single crochet through back loop: <http://crochet.about.com/od/crochetterms/tp/back-loops-only-or-blo.htm>
- **sl st**: slip stitch: <http://www.dummies.com/how-to/content/how-to-crochet-the-slip-stitch.html>
- **inc**: increase by working 2 single crochet stitches into 1 sc below (in case of this pattern, it's 2 sctbl into the sctbl below): <http://www.dummies.com/how-to/content/how-to-increase-with-single-crochet.html>
- **dec** or **sctog**: decrease by working 2 single crochet stitches together: <http://www.dummies.com/how-to/content/how-to-decrease-single-crochet.html>
- **join**: joining pieces with crochet: in order to join to pieces (or, in case of this pattern, the two sides of one piece) hold the pieces together with wrong sides facing and insert the crochet hook into both pieces at the same time, a foto tutorial can be found here (scroll down to "Joining with Crochet" <http://knitty.com/ISSUEwinter08/FEATwin08TT.php>)
- **[y]*x**: work the sequence y (within the brackets) x times.
- **crochet short rows** (as done in this pattern (*)): work sc's (or sctbl's) up to the stitch indicated, then turn work (without a turning-chain) and start into the 2nd sc; when you're working over this turn in a following row, always crochet into the turning-sc as well.
(*) there may be different methods out there, feel free to try them.

General Construction

When crocheting in the round, the structure of the finished piece looks different than when crocheting back and forth. Since in the original (knitted) Circle Mitts are knitted in the round (parts 1 and 2), back and forth (part 3) and then in the round again (part 4), I needed to change the pattern in a way that a change like that wouldn't occur - at least for parts 2 to 4.

Therefore, these mitts are constructed as follows: it starts with the thumb (part 1) which is finished by connecting the edges and creating a small tube (the thumb). Part 2 starts with crocheting around one edge of this tube and increases in circles. However after each "round" direction is changed (i.e. the round closed by a slip stitch and the piece is turned).

How to Crochet a Flat Circle

Start with a ring of 5 chains or a magic ring. Into this ring do a set-up row consisting 8 single crochets, close round with slip stitch.

In all following rounds, the stitch count should be increased by 8, i.e. in the first round every stitch, the 2nd row increase every 2nd stitch, in the 3rd row every 3rd, in the 4th row every 4th and so on ...

To avoid an octagon pattern, the increases should be made at different points, so the first rows may be

Round 0: sc to end, sl st into first sc, ch1 (-> 8 stitches)

Round 1: inc into every st, sl st into first sc, ch1 (every stitch was increase, now there are 16 stitches)

Round 2: [sc, inc] repeat to end, sl st into first sc, ch1 (every 2nd stitch was increased, now there are 24 stitches)

Round 3: [inc, sc 2] repeat to end, sl st into first sc, ch1 (every 3rd stitch was increased, now there are 32 stitches)

Round 4: [sc2, inc, sc1] repeat to end, sl st into first sc, ch1 (every 4th stitch was increased, now there are 40 stitches)

Round 5: [sc4, inc] repeat to end, sl st into first sc, ch1 (every 5th stitch was increased, now there are 48 stitches)

Round 6: [sc2, inc, sc3] repeat to end, sl st into first sc, ch1 (every 6th stitch was increase, now there are 56 stitches)

For this pattern the above recipe will be applied.

Gauge or What to Measure

If you're knitting for your own hands, you just have to try it on a few times before finishing. If you're knitting for somebody else, you'll need the following measurements:

- thumb circumference,
- hand circumference at wrist height
- hand circumference at base of thumb
- hand circumference at knuckle height

As with many of my patterns, it is written in a way that you can adjust it to your hand size. If you're uncomfortable with instructions like that, the pattern might not be for you.

Instructions

Part 1 (Thumb)

Row 0: ch 10 and 1 turning-chain

Row 1: sc 10; 1 turning-chain

Row 2: sctbl 10; 1 turning-chain

Row 3: sctbl 8, dec; 1 turning-chain

Row 4: sctbl 9; 1 turning-chain

Row 5: sctbl 7, dec; 1 turning-chain

Row 6: sctbl 8; 1 turning-chain

Row 7: sctbl 6, dec; 1 turning-chain

(Your piece should now be as high as half of your thumb circumference. If it's too small for that you can add an even number of "sctbl all, 1 turning-chain"-rounds.)

Row 8: sctbl 7; 1 turning-chain

Row 9: sctbl 6, inc; 1 turning-chain

Row 10: sctbl 8; 1 turning-chain

Row 11: sctbl 7, inc; 1 turning-chain

Row 12: stbl 9; 1 turning-chain

Row 13: sctbl 8, inc; 1 turning-chain

Row 14: sctbl 10; 1 turning-chain

Now your piece should look like in picture 1.

Fold the edges together (chain edge and your last row) and connect.

Part 2:

Setup Round: Chain 1, and stitch about 20 sc's into the rim of the thumb in the round (while you're doing this you're looking to the inside of the thumb), after about 20 stitches you should be back at the beginning. close with a slip stitch. Chain 1 and turn.

For the next rounds, do the circle crochet recipe from above, but crochet **sctbl** stitches. Don't forget to change crochet direction (ie. turn) after every round. If you had to crochet a few rounds more during part 1, there may be more stitches. If you have between less than or exactly 24 stitches in the round, you the next round should be increasing every 3rd stitch. If you made the thumb bigger and have more than 25 stitches start with increasing every 4th stitch. After a few rounds your piece should look as like picture 2.

Continue until the distance between the thumb and the upper edge is high enough for you. Make sure to **end on an outside row**.

For me this was the case after 13 rows.

To get you started here are the first few rounds spelled out

Round 1 (outside, ie. while crocheting you're looking at the outside of your piece): [sctbl 2, inc] repeat to end (or until there are less than 3 stitches, sctbl to end), chain 1 and turn (i.e. increase every 3rd stitch)

Round 2 (inside, ie. while crocheting you're looking at the inside of your piece):[sctbl, inc, sctbl 2] repeat to end (or until there are less than 4 stitches, sctbl to end), chain 1 and turn (i.e. increase every 4th stitch)

Round 3 (outside): [sctbl 4, inc] repeat to end (or until there are less than 5 stitches, sctbl to end), chain 1 and turn (i.e. increase every 5th stitch)

Round 4 (inside): [sctbl 2, inc, sctbl 3] repeat to end (or until there are less than 6 stitches, sctbl to end), chain 1 and turn (i.e. increase every 6th stitch)

Round 5 (outside): [sctbl 5, inc, sctbl 1] repeat to end (or until there are less than 7 stitches, sctbl to end), chain 1 and turn (i.e. increase every 7th stitch)

Round 6 (inside): [sctbl 2, inc, sctbl 5] repeat to end (or until there are less than 8 stitches, sctbl to end), chain 1 and turn (i.e. increase every 8th stitch)

... and so on ...

When the distance between the thumb and the upper edge is high enough, move to part 3.

Don't do a chain and **don't turn** after the last round.

Part 3:

Count your stitches, place stitchmarkers at the beginning of the round, the middle of the round, and around 5 stitches before the middle marker and 5 stitches after the middle marker. These last two markers mark the ends of the rows in part 3.

Don't turn but go on crocheting in the same direction, but now with slip stitches into the back loop until you have reached the marker that is placed 5 stitches before the middle marker.

The point of these slip stitches and the subsequent stitches into the stitch below, is to get an even texture on the outside - the slip stitches will be hidden behind the next row.

Your piece should now look as in picture 3.

Chain 1 and turn.

Row 1: dec, then sctbl into the stitch below and continue the circle increases (e.g. if you increased every 15th stitch in the last round of part 2, in this row you have to increase every 16th stitch) - for the first half (until the "beginning marker") stitch into the stitch below the slip stitches you just did; for the second half do normal sctbl's - until you are two stitches away from the other marker that is placed 5 stitches away from the middle marker, dec, chain 1 and turn

Row 2: dec, sctbl 9, turn, sctbl to last 2 stitches, dec; chain 1 and turn; dec, sctbl to last 2 stitches (while doing the circle increases) to the last 2 stitches, dec - this row with a short row is needed to widen the upper edge - your piece should now look similar to picture 4.

Row 3 = Row 2

Row 4: dec, sctbl (with circle increases) to last 2 stitches, dec

Repeat Row 4 until the the piece fits around your hand (or until the upper edge equals the hand circumference at the knuckles and the widest part equals the hand circumference at the base of the thumb) - see picture 5. If you want to widen the upper edge more, you can do one or more repeats of row 2 (i.e. using short rows).

Part 4:

After you have finished, count your stitches again. Devide the number of stitches by 4 and add 2 or 3. This is the number of stitches that you're going to connect to the other side of the mitt.

I had 99 stitches - divided by 4 makes a bit less than 25, plus 2 makes 27.

Hold the right sides of the mitt together and connect the number of stitches that you just calculated.

Your piece should now look like in picture 6.

Turn the mitt back right sides out (be sure to secure your last loop while you're doing this) and put a stitch marker in the current stitch.

(You can remove all other stitch markers at this point).

For an even texture you need again to hide the next few slip stitches before continuing.

If the last row you knitted in part 3 was an even numbered-row, you need to do slip stitches up the right hand side as seen from the current stitch, if it was an even numbered row, you need need to do the following slip stitches towards the left.

In my case, I had crocheted 7 rows in part 3, so I did my slip stitches up the left side (see picture 7).

Setup Row: sl st 14 on the inside of the mitt, turn

Now you can start to work on the little triangle on top of the joined stitches as follows (see picture 8). These are short rows, so you don't crochet a turning-chain but start with the second stitch.

Row 1: sctbl 11 (into the stitches below the slip stitches you just made), dec, (now you should be back at the marker), dec, sctbl 14, sl st 1, turn

Row 2: sctbl 11, dec (now you should be back at the marker), dec sctbl 8, sl st 1, turn

Row 3: sctbl 5, dec (marker) dec, sctbl 8, sl st, turn

Row 4: sctbl 5, dec (marker) dec, sctbl 2, sl st, turn

Row 5: dec (marker) and close with slip stitch, chain 1

Now do several more rounds of sctbl's until the shaft of the mitt is as long as you want it, i.e.

Round: sctbl to end, sl st into first stitch, chain 1, turn

Make sure to end each round with a slip stitch, chain 1 and turn - to keep up the regular

stitch pattern.

Try your mitts on for size (or measure the circumference, it should equal your wrist circumference). If the shaft is too wide you can do some decreasing rounds as well, i.e. Decreasing round: dec, sc2bl to last 2 stitches, dec, sl st into first stitch, chain 1, turn

Weave in ends.

Make two.
