

TUNISIAN LIZARD RIDGE AFGHAN

Instructions by Dela Wilkins

LIZARD RIDGE

(<http://www.ravelry.com/patterns/library/lizard-ridge>) by Laura Aylor is a popular knitting pattern that lends itself well to be worked in Tunisian Crochet stitches. Laura has given me permission to write up the Tunisian instructions.

In this “translation” I suggest you review or print the knitting pattern and make the following adjustments:

1. Make a Tunisian Simple Stitch (TSS) sample in your yarn of choice to determine the correct hook size for a fabric that drapes well. A hook 3 mm larger than that recommended for the yarn is a good starting point.
2. Determine your gauge based on your stitch sample.
3. Two rows of knitting are similar to one row of Tunisian

crochet: the forward pass is the “knit row”; the return pass is the “purl row”.

4. Wrap and Turn is used in the knitting pattern to avoid a hole where the short row ends. I tried several methods but ended up ignoring the wrap, just worked the “turn”, leaving small open spaces at the end of the short rows.
5. In the pattern notes, omit the first four bullets. Go to bullet 5. The stitch count is a multiple of 14 plus one. The Tunisian version will have 6 rows instead of 12.
6. The short rows are offset in rows 2 and 5. All the short rows are worked on the return pass.

Directions Version 1

Chain 43 and work a foundation row (forward pass and return pass). 43 stitches.

Row 1: TSS forward pass and return pass. 43 stitches.

Row 2: TSS forward pass. In the RETURN PASS you will work short rows in the following manner:

Return pass on the first 12 stitches. Stop.

**Forward pass on 8 stitches: the first one is there from the end of the short row return pass, TSS into the next 7 stitches.

Return pass on 7 stitches.

Forward pass on 6 stitches: the first one is there from the end of the short row return pass, TSS into the next 5 stitches.

Return pass on 5 stitches.

Forward pass on 4 stitches: the first one is there from the end of the short row return pass, TSS into the next 3 stitches.

Return pass on 20 stitches. Stop.**

End the last repeat with a return pass on 9 stitches. 43 stitches.

Row 3: TSS forward pass. When you come to the end of each short row, work only under the front vertical bar as a TSS, not into two threads as you would at the end of a normal row. 43 stitches. Return pass.

Switch colours at this point if you would like some contrast.

Row 4: TSS forward pass and return pass. 43 stitches.

Row 5: Return pass on 5 stitches. Stop.

TSS to end (5 stitches). Return pass on 4 stitches. Stop.

TSS to end (4 stitches).

Return pass on 19 stitches. Stop.

**Forward pass on 8 stitches: the first one is there from the end of the short row return pass, TSS into the next 7 stitches.

Return pass on 7 stitches.

Forward pass on 6 stitches: the first one is there from the end of the short row return pass, TSS into the next 5 stitches.

Return pass on 5 stitches.

Forward pass on 4 stitches: the first one is there from the end of the short row return pass, TSS into the next 3 stitches.

Return pass on 20 stitches. Stop.**

End last repeat with a return pass on 16 stitches (to the beginning of the row), then TSS forward pass on 5 stitches (the first one is already there). Return pass on 5 stitches, TSS forward pass on 4 stitches (the first one is already there) and return pass on 4 stitches. 43 stitches.

Row 6: TSS forward pass. When you come to the end of each short row, work only under the front vertical bar as a TSS, not into two threads as you would at the end of a normal row. 43 stitches. Return pass.

Switch colours again here.

Repeat rows 1-6 until desired length, then TSS one more row and bind off.

Note: when you count the edge stitches to determine the number of rows, Rows 1-3 have 3 side edge rows, and Rows 4-6 have 5 side edge rows since there is a short row section on the edge of the fabric.

If you make a wider fabric, the repeat pattern will be the same as in version 1. Version 2 is worked on 183 stitches.

In my first version, I used James C Brett Marble Chunky (bulky weight) and a 9 mm Tunisian hook. Here are the links to my Lizard Ridge Projects: <http://www.ravelry.com/projects/Lifecare/lizard-ridge> and <http://www.ravelry.com/projects/Lifecare/lizard-ridge-2>
